DETAILED ACTION***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification does not include the term “absence” when referring to the analysis or analysis module testing the patient for ischemia. The specification does not include the term “hysteresis threshold” (the specification uses “hysteresis” or “stickiness threshold”).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-85 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1, 13, 25, 33, 49, 65, 77, 81, and 85, “against a predetermined indicator threshold, including at least one hysteresis threshold” is vague since it can not be determined if the phrase “including at least one hysteresis threshold” is related to the indicator threshold or the testing against the patient status change. In addition, it unclear if the “hysteresis threshold” is the same as the stickiness threshold. If the hysteresis threshold is the same as the stickiness threshold, it can not be related to the indicator threshold since they are different. Also, claims 6, 18, 30, 46, 62, and 74, should be clarified to state that the “hysteresis threshold comprises a set of stickiness....” if the hysteresis threshold is the same as the stickiness threshold.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-85 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-85 of U.S. Patent No. 6368284. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patented claims meet the limitations of the application claims. In addition, to include a server to perform the retrieving and processing in the patented claims would be obvious to one having ordinary skill in the art at the time the invention was made since it was known in the art for a monitoring system to use a server to retrieve and process the data since a server would provide an automated and efficient means to quickly process, retrieve, and display the data and prognosis.
